Development Review Board Concept Plan Review Application Information/Checklist

Development Review Board

The City of Flagstaff's Development Review Board (DRB) consists of City staff representing the Planning and Zoning, Building and Safety, and Engineering Divisions and the Fire, Public Works, and Utilities Departments. The DRB reviews development proposals to ensure that all applicable City code requirements are met.

Concept Plan Review

DRB Concept Plan Review is a preliminary review process that is intended to assist the applicant in understanding applicable City code requirements before formal development plans are prepared and submitted for Site Plan Review. Prior to a scheduled Concept Plan Review meeting, DRB members will review the concept plans submitted with the application. During the meeting, DRB members will advise the applicant of the requirements, including applicable Design Review guidelines, which must be addressed prior to making an application for DRB Site Plan Review. The Planning staff will provide information to the applicant on existing conditions adjacent to the development proposal. No formal action is taken at a DRB Concept Plan Review meeting.

Schedule

DRB Concept Plan Review meetings are held on Thursdays of every month. A schedule of DRB concept plan review meetings is attached. Complete applications must be submitted by 11:00 am on the Wednesday 15 days prior to the meeting. At the time an application is submitted, the applicant will be asked to select a meeting date and a time slot (1:15 pm, 2:00 pm, 3:00 pm or 4:00 pm during winter hours or 11:00 am, 1:15 pm, 2:00 pm or 3:00 pm during summer hours). Meeting times are assigned on a first-come, first-serve basis. Applicants should report to the Community Development Counter prior to the assigned meeting time.

Applicability

DRB Concept Plan Review is **mandatory** when Design Review guidelines are applicable, and strongly encouraged in all other cases. When required, DRB Concept Plan Review takes place prior to submitting for DRB Site Plan Review, for all site plans, subdivisions, conditional use permits, rezonings, and annexations. Please refer to Sections 10-10-004-0003(B) and 10-16-002-0001(B) of the Land Development Code (LDC) for further information on applicability.

Submission Requirements

All applications for DRB Concept Plan Review must be accompanied by:

- ☐ Seven (7) copies of a concept plan
- ☐ One (1) copy of a preliminary resource protection plan (when applicable)

All plans submitted with the application must be folded to 8.5 by 11 inches in size.

Concept Plan

The concept plan does not have to be prepared by a professional architect or engineer, however, it must be drawn to a regular engineering scale (i.e. 1 inch = 10 feet, 1 inch = 20 feet, 1 inch = 30 feet, etc.) and plotted on a sheet no larger than 24 by 36 inches in size. The concept plan must include the following basic information about the proposed development.

- ☐ Parcel boundaries and dimensions (existing and proposed)
- ☐ Contour lines at two-foot intervals (existing)
- ☐ Building footprints (existing and proposed)
- ☐ Dedicated rights-of-way and street names (existing and proposed)

- ☐ Pedestrian facilities/sidewalks (existing and proposed)
- ☐ Points of access and driveways (existing and proposed)
- ☐ Parking lots/layout (existing and proposed)
- ☐ Utilities (water and sewer) (existing and proposed)
- ☐ Drainage systems on the site (existing and proposed)
- ☐ Open space or parks (existing and proposed)

In addition, the information listed below must also appear on the site plan:

- ☐ Development name
- ☐ Site address
- ☐ Parcel number
- ☐ Scale
- ☐ North arrow
- ☐ Site acreage
- ☐ Building square footage (non-residential projects)
- ☐ Number of dwellings (residential projects)

Preliminary Resource Protection Plan

A preliminary resource protection plan, when required, shows the general location of natural resources on the site before and after the proposed development (refer to Section 10-01-004-0001(C) of the LDC for applicability). Its intent is to identify and locate resources so they can be taken into account during site planning. For the purposes of the preliminary resource protection plan, forest resources can be estimated from aerial photography of the site, and slope resources can be estimated from City aerial topography. Resources that must be estimated are listed below:

- ☐ Forest canopy
- ☐ Slopes of more than 17 percent
- ☐ Floodplain

Other Supporting Information

In some cases, it may be helpful to submit a brief narrative describing or providing additional details regarding the proposed project. The more information DRB staff has in advance of the meeting, the better able they are to provide comments and answer questions about the project.

Applications will not be accepted or scheduled until all of the submission requirements have been met.

For Further Information

For further information regarding the application and submission requirements, please contact:
